

01.01.2023

**Canadian Environmental Protection Act (CEPA)  
CEPA SOR/2021-148 Compliant by virtue of EPA TSCA VI compliance**

Vipco Group is pleased to confirm our CEPA SOR/2021-148 compliance with the Canadian Environmental Protection Act's Formaldehyde Emission Regulations, frequently referred to as CANFER. We are a chain of custody fabricator and validate incoming materials with acknowledgments, bills of lading, and invoices from our vendor partners.

**In accordance with the regulatory requirements, Vipco Group is not a composite panel manufacturer and may not have a CEPA (or TSCA VI) Third Party Certificate of our own.**

- We only source composite panels from TSCA VI and CARB II compliant mills with valid third-party certificates.
- Declarations of Certification are maintained and made available in compliance with the Canadian regulations.

**We track incoming materials through our Enterprise Resource Planning software**

- Compliance statements are included on all required documents – acknowledgments, bills of lading and invoices.
- This is our assurance to you, our customer, that you are buying and using compliant composite panels and components.
